**SE**

Skruvinfästningar ska göras i betong eller annan massiv konstruktion, träreglar, träkortlingar eller i konstruktion som är provad och godkänd för infästning, till exempel skivkonstruktion. Se exempel på godkända konstruktioner på [sakervatten.se](http://sakervatten.se). Material för tätning ska fästa mot underlaget och vara vattenbeständigt, mögelresistent och åldersbeständigt. Krav på tätning gäller både i våtzon 1 och 2.

**GB**

Below are Swedish recommendations:

Screw fastenings should be made in concrete or other solid structure, wooden studs, wooden noggings or in structures that have been tested and approved for fastenings, for example a sheet construction. See examples of approved constructions at [sakervatten.se](http://sakervatten.se). Sealing substances must fixate to the materials it aims to seal, be waterproof, mould-resistant and age-resistant. Requirements for sealing apply in wet zones 1 and 2.
