glass towel dryer

ONYX™

Functionality becomes stylish

About the company

Founding my company HYBRO Technologies in 2010, I followed a guiding principle - every product should have three features: functionality, innovative design and the highest quality.

Today HYBRO Technologies is a leader in the production of energy efficient products in the green/climate change market.

Modern standards and production techniques insure the highest quality of our products.

We welcome you to discover our products.

Founder of HYBRO Technologies and
designer of HYBRID and ONYX collections

Ilya Lapyshev

Why it is unique

The ONYX towel dryer is not an evolution, it is a brand new product from HYBRO Technologies, that will change the industry and replace already familiar and standard towel dryers.

SAFETY

Degree of protection: IP-44. Water resistant.

INSTALLATION

Simple and fast.

SAVING

Low power consumption saves your electrical usage.

DESIGN

Ultra-thin. The thickness of each model is only 8 mm.

FUNCTION

Bathroom heating and towel drying.

QUALITY

Official warranty – 5 years. Lifetime – more than 30 years.

Functionality

The OFF-timer allows the towel warmer to turn off automatically after 3 hours. After this time, the towel will be completely dry and ready to use again. The function helps in conserving energy and ensuring that the towel warmer isn't left on for longer than necessary.

The delicate drying feature is designed to gently dry towels without damaging or overheating them. The drying of towels is done by even and contactless transmission of heat from the glass panel through the towels. At the same time, the towel rails will remain cool to the touch. This absolutely differs from ordinary towel dryers, where heat transfers through direct contact with the hot surface. This can be especially useful for delicate fabrics or for drying towels that may be sensitive to high temperatures.

The heating function of the ONYX towel dryer allows it not only to warm up towels and keep them warm and cozy, but also to heat up the bathroom at all. ONYX has 3 heating modes to maintain the comfortable temperature in the bathroom.

ONYX towel dryer is made of tempered glass. It provides high durability and safety. The heating element is evenly positioned between the glass and the housing in one fully sealed unit. Stainless steel is used to make the polished rails.

Total thickness of the product only 8 mm. The ultra-slim design emphasizes the unique style, and our innovative design, makes HYBRO products instantly recognizable.

3 in 1

ONYX is a modern towel dryer, which allows you to perform three tasks at once:

- carefully dry your towels
- comfortably heats the bathroom
- adds style to the bathroom interior

Model range

ONYX 1L

Power	160 W
Width	620 mm
Height	300 mm
Thickness	8 mm
Heating area	3 m ²
Weight	4 kg

ONYX 2M

Power	350 W
Width	470 mm
Height	900 mm
Thickness	8 mm
Heating area	6 m ²
Weight	8 kg

ONYX 3M

Power	470 W
Width	470 mm
Height	1200 mm
Thickness	8 mm
Heating area	9 m ²
Weight	11 kg

Voltage: 230 V | Operating frequency: 50 Hz | Degree of protection: IP 55 | Control: Sensor | Front: tempered glass | Back: Metal | Color: Black / White
Infrared heating: front glass panel | Air convection: natural heat flow | Warranty: 5 years | Lifetime: 30 years

Our next innovative solution was to create a separate ONYX towel dryer for the kitchen. This will greatly expand the scope of the towel dryers in general.

With perfect quality and non-aging design, the ONYX towel dryer will be an indispensable device in modern kitchens for a long time.

HYBRO technologies™

Вітаємо у світі, де технології приносять комфорт,
